

**Democrats Seek** A Wider Inquiry Into Arms Sales

By Bob Woodward Washington Post Service WASHINGTON - In an outbreak of partisan disagreement in Congress over the Iranian arms af-fair, the Senate intelligence committee voted 7-6 not to release a staff report on the panel's investi-gation into the affair.

According to a source close to the investigation, the 16-page re-port said that the committee's inquiry had produced no evidence that President Ronald Reagan was aware of the plan attributed to Lieutenant Colonel Oliver L. North, a Marine Corps officer working on the staff of the National Security Council, to use the arms

sales to Iran to generate money fur the Nicaraguan rebels. The decision was made by the Republican-controlled panel that was sitting in the previous Con-

gress. One Republican, Senator Wil-liam S. Cohen of Maine, joined the committee's six Democrats in vot-

ing not to issue the report. The ranking Democrat on the intelligence panel in the 99th Con-gress, Senator Patrick J. Leahy, Democrat of Vermont, said Mon-'Very Well' WASHINGTON - President day that the staff report was "inac-Ronald Reagan is recovering "very well" from his prostate surgery and curate and incomplete." By John Kifner New York Times Service QARDAHA, Syria - From the coastal road

below Latakia, a four-lane highway suddenly materializes, climbing up to this tiny mountain village, and then just as suddenly peters out.

SONE

The village is not much to look at: A single main street of low, stone shops on a rise in the rocky, barren hills. But near the only gas station there is an imposing abstract monument with a bas-relief of the flag of the ruling Ba'ath Arab Socialist Party thrust into a map of the Arab

world with Syria at its heart. A couple of blocks away, behind a high yellow wall, guarded by troops of an elite unit, stands the opulent palace of Qardaha's favorite son, President Hafez al-Assad.

A large communications disk is going up atop a new building, and all over these hills there is the finsh of construction and prosperi-

Syria Alawites: Underclass to Ruling Class ty. For this is the Jebal el Ansariye, the mountain range that is the home of the Alawites, the once impoverished and despised minority sect that now rules this country with an iron hand.

"The old men on the street were bent over, toothless, their skin horribly wrinkled, with worn, shabby peasant clothes," said a Western

diplomat, recalling a recent visit here. "Then you saw the young men, tall and strong from a good diet, wearing their uniforms, sharply tai-lored, chatting with the girls with the easy arrogance of power."

"There it was in a nutshell," he said. "From underclass to ruling class in a single generation."

In the Middle East, from the time of the Ottomans and before, government has been for the benefit of the governors. Ideological and class interests in this part of the world nearly always have historical roots in religious differences. Even so, the tale of the Alawites of Syria is a remarkable success story.

The Alawites, between 11 and 13 percent of Syria's roughly 10 million people, are distin-guished as a social class by their religious beliefs, regarded by orthodox Moslems as heretical

The origins of the sect are lost in tribal history, but it clearly draws nn both pagan traditions and Christian ritual as well as a eavy overlay of the Shiite branch of Islam.

The most important tenet of the Alawite faith is that Ali, the son-in-law of the Prophet Mohammed, is divine, God assuming a human form, somewhat along the lines of Jesus in Christianity. This is in direct conflict with the standard Moslem injunction that "there is no See ALAWITE, Page 2

preventing drug abuse have been distributed to schools, not one teacher surveyed recently by a See DRUGS, Page 2

### **Argentine Groups Plan Thousands of Charges Against Security Forces**

By Juan de Onis International Herald Tribune BUENOS AIRES — Thousands of new accusations of human rights violations by Argentine security

forces will be filed in federal courts before the deadline for prosecu-tions imposed by a new law, leaders

of Argentine human rights organi-zations said Tuesday. Emilio Mignone, who heads the Center for Legal and Social Stud-ies, a legal office serving the human rights groups, said that the groups have prepared thousands of cases and will submit them Thursday to civilian courts that have jurisdiction over the cases.

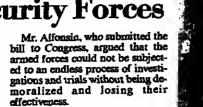

"The federal courts may not have time to consider all the cases before the deadline expires" on Feb. 27, "but we think there will be grounds for hundreds of prosecutions," Mr. Mignone said.

Mr. Mignone said that if the courts accepted the evidence presented as a basis for trying the accused, the trials could take place beyond the termination date for the

presentation of oew charges. Leaders of Argentina's human rights organizations and the opposition Peronist Party held street marches last month to protest the amnesty law adopted by Congress last month and signed by President Raúl Alfonsin on Dec. 26.

After a two-month period, the law forbids new charges against the military for crimes committed in the 1970s during the so-called "dirty war" against leftist guerrilla groups.

Human rights groups have docu-mented the disappearance of 9,000 prisoners taken by the military during the conflict. In many cases, prisoners died under torture.

The federal courts have sentenced 10 senior army, navy, air force and police officers to prison

The cases are being submitted to the federal civilian courts because the military court system ruled on only one of 1,800 cases that were presented by a special commission set up hy the Alfonsin government. prese

In that case, a navy lieutenant, Adolfo Astiz, was absolved in the killing of an 18-year-old Danish WORK in who died after being arrested in a military anti-subversive op-eration in 1977.

Strikes Spread Two former presidents of the juntas that ruled Argentina after the military sezzed power in 1976, Jorge Videla and Emilio Massera, against unemployment. have been sentenced to life imprisonment. The sentences were confirmed by the Supreme Court last

month The new cases that are to be submitted to the courts involve mainly middle-ranking officers and policemen accused of murder, torture, rape and theft. Some of the cases involve personnel who are still on active duty.

Among the major cases for which charges already have been filed are those against General Lument

The SH-2 helicopter, based on the destroyer O'Bannon and intended for anti-themarine warfare, was conducting routine operations over the Gulf. The merchant ship fired a surface-to-sir missile at the helicopter.

The ship's identity and country of registry are not known, a Delense Department statement said. The department said it was investigating the incident.

### Israel May Drop Jet Plane Project

JERUSALEM (AP) - Foreign Minister Shimon Peres informed a J.S. military official on Tuesday that Israel would seriously consider U.S. proposals to halt production of an advanced jet fighter and replace it with different project.

But Mr. Peres made no commitment on whether the cabinet would agree to stop making the Lavi plane, which is expected to help Israel's high-technology industries, according to a government official who

sisted on remaining unidentified. Mr. Peres met with the U.S. assistant undersecretary of defense, Dov Zakheim, who outlined U.S. suggested alternatives to the Law. The United States contends that the Law, the first prototype of which was a flown last week, will be too expensive to manufacture. The United States has budgeted \$250 million a year out of \$1.8 billion in military aid to Israel toward the Lavi.

### Shultz Begins 8-Day African Voyage

WASHINGTON (Renters) - Secretary of State George P. Shuitz left Vashington on Tuesday on an eight-day official visit to Senegal, Cameroon, Kenya, Nigeria, Ivory Coast and Liberia.

Officials said he would make a major speech in Senegal on Thursday and was expected to urge the sub-Saharan region to press ahead with free market growth and move away from central planning to deal with deep

and widespread economic crisis. The officials, who asked not to be identified, said the other chief sim of the trip was to discuss Libya. The officials said that Libyan activities in Chad, its attempts to subvert other countries and its increasing role in Sudan were issues of prime importance to the countries Mr. Shultz would visit

#### U.S. Air Controllers Ask Union Vote

WASHINGTON (AP) - About 40 percent of U.S. air traffic controllers are asking the government to recognize a fledgling union as their argaining agent, the union said Tuesday.

The controllers have been without a union since President Ronald Reagan dismissed 11,400 striking Federal Aviation Administration controllers in 1981,

The National Air Traffic Controllers Association said that it had filed ,800 sign-up cards on Monday with the Federal Labor Relations Authority seeking an election to become the controllers' collective bargaining agent.

Shevardnadze Hopes for Afghan Pact

MOSCOW (WP) — Foreign Minister Eduard A. Shevardnadze said in Kabul that a political settlement in the seven-year Alghan war was "feasible and as close as never before," Tass reported Tuesday.

(Continued from Page I) God but Allah, and Mohammed is Ali was, Alawites believe, the

seventh such manifestation of God, who each time was assisted by two men, forming a divine triad. A virtuous Alawite will be reborn after death as a star. One who is not will be reincarnated as a Moslem, Jew or Christian to try to get to be an Alawite again, but after seven lives, will become a star in any case.

Persecuted for their beliefs, the Alawites, like the Maronite Catholics of Lebanon, withdrew to more easily defensible mountaintops. They are found only there, working as tenant farmers on the plains below or in a few scattered settlements in nearby areas of Turkey

**ALAWITE:** Syria's Ruling Class ed service in what was, in effect, a colonial army. The French, howev-er, welcomed the Alawites into the anny in a divide-and-rule tactic.

Thus, after independence, a network of Alawites grew to a nearmonopoly in the organized use of force, the key to control. "Many Alawites who had been

able to attain a secondary education used the military academy as a means to continue their education, which otherwise they could ill-af-

ford," writes Peter Gubser, a student of the area, "Once Alawites gained positions in the ranks, the poncommissioned officer corps and the commissioned officer corps, they encouraged their relatives, fellow tribesmen and fellow villagers to join the military."

At the same time, he said, the niority, which had angered the enpattics,

his prophet."

A rural people in an urban, trading society, Alawites were scorned and sometimes stoned when they came to town. Some became house servants of the wealthy Sunni Moslem merchants of Damascus, Aleppo, Hama and Homs.

What changed things for the Alawites were two institutions: the Ba'ath Party and the Syrian Army.

Ba'athism, a radical, pan-Arab ideology spreading across the Middle East in the 1940s and 50s, is a secular rather than an Islamic movement and thus had a particular appeal to the minority Alawites.

Even when the party was sus-pended during the brief union with the Egypt of Gamai Abdel Nasser, Mr. Assad and other Alawite leaders kept their octwork alive in the Latakia branch, which later enabled them to take over the party.

Before World War II, under the French mandate over Syria, the Sunni Moslem upper classes resist-

cutting spending over the long term. While Mr. Miller has justified them as part of a campaign to "privatize" federal functions, critics say

they are a "quick fix." The budget is filled with many other proposals, such as increased user fees for federal services, that Congress has repeatedly rejected. Mr. Reagan also is seeking deep cuts in farm spending, fundament tal changes in college loans and cuts in the Medicare health insurance program that may prove unac-

ceptable on Capitol Hill. Once Mr. Reagan promised to balance the budget by 1983. Now that he cannot balance it any time in his presidency, he says that getting the deficit down to about \$100 billion would "bring it within the

range of our previous pescetime experience" and "bring our goal of a balanced budget much closer to realization."

at leaders of both parties in the Senate agreed last month to establish

The Democratic draft resolution would authorize the panel to look into "the generation and use" of any "moncy, item of value or service to provide assistance" to rebels

fighting the government. This language, Republicans said, is broad enough to permit the Senate to deive in to every aspect of the methods used to raise money for

the guerrillas. Mr. Dole objected strenuously to agreement reached earlier in Octo- the scope of the mandate, saying that such a wide-ranging investiga-

tion was unwarranted. He noted that the Democratic plan would permit the inquiry to continue matil Oct 30 a date that he said would produce a report in 1988, a presidential election year. The intelligence panel released no details of its report, but a source

familiar with the committee's work described it Monday night. The report sheds new light on the process by which the administration sought in late 1985 and early

1986 to provide a legal basis for its covert arms shipments to Iran. It was previously known that on Jan. 17 Mr. Reagan signed an intelligence finding, or order, anthoriz-

ing those shipments. But the report discloses that this was the third legal document drafted for this purpose, the source said. The first version was drafted

Nov. 25, 1985, the report says, be-cause, John N. McMahon, then deputy director of the Central Intelligence Agency, had learned that Colonel North had obtained CIA assistance in acquiring an airplane to deliver arms to Iran earlier that month.

However, the source said, that order was never signed by Mr. Reagan, and apparently was designed to pacify Mr. McMahon, who was known for his insistence that the CIA adhere strictly to the law gov-

erting covert operations. A second, previously undis-closed version of the intelligence finding was signed on Jan. 6, 1986, by Mr. Reagan. This version of the document referred to the Israeli immediate word from Beijing of role as an intermediary in the arms transfers to Iran, the sources said.

The Soviet foreign minister said that a reconciliation plan proposed by the Afghan leader, Major General Najibullah, on Thursday and adopted over the weekend, was beneficial not only to Afghanistan but to its neighbors. Afghanistan is extending a conciliatory hand, Mr. Shevard-nadze said, adding that its neighbors "will do wisely if they do not push it

### South Africa Theater Chain May Close 3

JOHANNESBURG (Reuters) - South Africa's biggest motion picture chain, facing boycotts by U.S. moviemakers, threatened Tuesday to

close its theaters in towns enforcing racial segregation of audiences. David Isaacs, marketing director of Ster-Kinekor, said his company had told the town council in Krugersdorp, near Johannesburg, that its two theaters would be closed by the end of this month unless nonwhites were admitted. Mr. Isaacs would not identify the films that Ster-Kinekor was unable to purchase from American distributors. But he said that Columbia Pictures and Warner Brothers had been pressing the South Africans on the racial issue.

He said that his chain, with 150 ontlets, had difficulty obtaining foreign films although less than one in 10 of its theaters were still segregated. "American companies do not want to supply movies to segregated cincinas," he said

### 'Reverse Peace Corps' Is Suggested for U.S.

Over the past quarter-centu-ry the Peace Corps has sent 120,000 volunteers to work in 93 underdeveloped countries. Now the corps is proposing a new twist: a "reverse Peace Corps" of Third World volunteers who would go to the Unit-ed States to teach their native languages and work on development projects, the Los Angeles Times reports.

"The greatest thing we could have is this reverse Peace Corps, building these bonds, these partnerships for peace," said Loret Miller Ruppe, the Peace Corps director. Mrs. Ruppe, 51, is an heiress to the Miller brewing fortune and wife of Philip E.

Ruppe, a former Republican congressman from Michigan Lewis Greenstein, a Peace Corps official, said that in the early 1970s volunteers from Ni-gena, Jamaica and other coun-tries worked on American Indian reservations and in hospitals. "But," he said, "it was quashed after one year, 1 am told, largely because of im-

teers."

#### Legal Battles PROPERTY. TIMES STREET CARD **UK** companies **On Fire Start** In San Juan C. 200 Per The legith segment free leave and Million The main By Kevin Klose ngton Past Service SAN JUAN, Puerto Rico ---- The WORLD STOCK MARK first court papers have been filed in Shares cally inducing GNP units what is likely to become a protract-ed legal battle following the fire at the Dupont Plaza Hotel that killed 96 people on New Year's Eve.

"Reports are widespread that a multitude of attorneys" have landed in Puerto Rico or are headed here to press claims against the hotel, lawyers for the hotel said Monday in a petition filed in U.S. District Court here. They asked that access to the hotel be carefully controlled by a judge to ensure the integrity of evidence.

John Coale, a partner in Coale & Kananack, a law firm in Washington, D.C., specializing in damage claims suits, said he filed a motion on behalf of a client injured in the fire, the first step in a move to obtain a court order to have the evidence preserved.

Some of the most prominen negligence attorneys from the United States are in the commonwealth "for the long hanl," as one of them said Monday. Many are longtime adversaries who have rep-resented opposing sides in other disasters.

The family of Juan Rosario Torres, 63, who worked at the hotel, is seeking \$9 million in damages. The suit alleges that Mr. Torres suffered greatly before his death because of the "intentional, negligent and careless acts of the defendant."

The suit also accuses the hotel of "closing and sealing the casino doors and entrapping the dece-dent." Hotel officials have denied that the casino exits were locked a the time of the fire.

The suit names as defendant Ho tel Systems International of Santa Monica, California, which atter neys for the plaintiffs said owns the San Juan Dupont Plaza Corp. of Delaware.

A second suit, seeking \$10 mil lion in damages, was filed by José Aponte Rodriguez, also of Puerto Rico, who was in the casino when the fire broke out. Mr. Aponte had a concussion and his ankle was bro ken.

The suits contend the 20-story luxury hotel was negligent in failing to install fire-prevention measures.

 Theory on Origin Cited A federal investigator said it has been determined that the fire started after an arsonist ignited furniture stored in plastic wrapping "in the ballroom area," The New York Times reported Tuesday from San

tions will be held for the all-white House of Assembly, the only one of the three racially segregated chambers of Parliament that matters. The election, which under the constitution could have waited until 1989, will probably be in April.

Page 4

Last year was not a good one for Mr. Botha or for South Africa. There has been unprecedented violence. Black opposition, going far beyond any of the government's expectations, has made the huge black townships ungovernable. Repres-sion and a clampdown on the foreign and domestic press have deepened Pretoria's isolation but failed to cow the blacks. The U.S. Congress, overriding President Reagan's veto on sanctions, signaled a basic change in the mood of governments and public opinion in the West. Acceptance of the African National Congress has grown both inside South Africa and in Western countries; U.S. Secretary of State George Shultz and British Foreign Secretary Sir Geoffrey Howe both have plans to confer with Oliver Tambo, the ANC leader, in the near future.

Mr. Botha may be right in assuming that his ruling National Party will emerge with an increased majority in the Honse of Assembly. But he knows that the parties of the hard-line Afrikaner right are on the move and that the pro-reform liberal

President Picter W. Botha is turning to opposition is on the defensive. There is South Africa's white electorate in a bid to some reason to be suspicious, therefore, reassent diminished authority and recoup when he says the purpose of the election political initiative lost in 1986, at home is to measure white attitudes toward raand abroad. He has announced that elec- cial reform. He must have a pretty good idea of what those attitudes are.

It is hard to see what good could come from this election. President Botha once seemed to have a policy for slow - too slow -reform of the system of apartheid, which he called "outdated" at the start of 1986. A few months later he shelved all plans for limited reform and opted for a policy of confrontation. Since then it has become increasingly clear that the issue in South Africa is no longer one of limited power sharing, with the white minority keeping its supremacy while giving up a small portion of its political and economic power to the black majority.

Black South Africans demonstrated in 1986 that they are no longer willing to accept less than majority rule. Radicalization of blacks has been matched by the emergence of a right-wing white backlash. Polarization can only be heightened by the electoral campaign and its after-math. The only steps that could have relieved tension and pulled the country back from the brink of catastrophe release of Nelson Mandela, lifting of the ban on the ANC and the start of talks between the latter and the government --have now even less chance of being taken. The rush toward all-out confrontation is apt to gather even more speed. INTERNATIONAL HERALD TRIBUNE.

### If Not Now, When?

Cultural convergence: It is the proposi-tion that, for all the Soviet-American hostility, the advance of technology and the com-plexity of modern civilization are steadily making the two nations more similar. The idea has superficial appeal given the emer-gence in Moscow of Cardin fashions in the shops, news briefings in the Foreign Ministry and hard rock in the arenas.

It is also evident, say what you will about evil empires and capitalist conspiracies, at the level of oratory. The New York Times recently published key passages from a remarkable talk last June to a group of Soviet writers by Mikhail Gorbachev. "The society is ripe for change," he said, "If we step away, the society will not agree to a return. The process must be made irreversible. If not us, then who? If not now, when?"

The thought struck some readers as fa-

#### miliar, perhaps even American. One of the Kennedys, maybe? Not exactly. The recent source is President Reagan, in his second inaugural address, just two years ago. He was talking then, as now, about the need to end decades of deficit spending:

"We've come to a turning point, a mo-ment for hard decisions. I have asked the cabinet and my staff a question, and now I put the same question to all of you. If not us, who? And if not now, when?"

That, however, is only the recent provenance. Questions like these have reverberated for 20 centuries, since Rabhi Hillel asked, "If I am not for myself, who is for me? If I care only for myself, what sm I? If not now, when?" More than complexity or technology, there are grounds for convergence in those questions, all three of them. - THE NEW YORK TIMES.

### **Reagan's Budget Poker**

What is a federal budget: (a) a realistic wish to reduce farm subsidies or eliminate blueprint from the president for spending and taxes; or (b) the beginning of a poker Congress has turned him down each year. game with Congress over who gets the cred-it for spending and the blame for taxes?

The usual answer is both, but not this

The detail of Mr. Reagan's plan is limited. The Gramm-Radman-Hollings law sets a Jan. 5 deadline and be has complied only time. The 1988 budget, President Reagan's technically by submitting a summary. Parseventh, is such a pallid, temporizing ver- ticulars are to follow but there are some IUVC clc calls in what is known now. M does not propose increasing defense as much as in the past. He grapples at last with the spiraling costs of some major entitle-ment programs — farm subsidies, Medicare and Civil Service pensions. While he continues to insist, wrongly, that any "tax increase" is out of the question, he proposes to raise revenues by \$23 billion. There are also some small signs of social concern: limited funding for the homeless ... more money to retrain displaced workers ... increases for AIDS research and reducing infant mortality among the poor ... hesitant steps against acid rain. But in many more ways, this budget would chip away at programs that help the disadvan-taged, directly and through strapped mu-nicipalities. He blames the deficit for such stringency and brags of at last making headway to get the deficit down - without mentioning whose administration got it up. This budget is Mr. Reagan's first communication with the new Congress. The language is carefully tempered; he seeks no confrontation, his spokesmen insist. But neither does he offer a plausible program. The budget is the president's time to lead, to take responsibility, to bet his poker hand. With this budget, Mr. Reagan says, I pass. -THE NEW YORK TIMES.

#### Where did we go wrong?

### On Cue or Not, China's Students Start Something

By Merle Goldman

B ostron — In reports about the student demonstrations in Chi-na, too little has been said of the restraint shown by the Communist Party. Given its tremendous power, China's one-party state could easily have nipped these demonstrations

at the very beginning. Even as party leaders hankly de-, nonneed the demonstrators, they allowed a protest for a more open. nominating process to people's congresses to expand into a general demand for competitive elections and freedom of speech. The demon-strations spread for at least four weeks to major cities. There are several reasons for the

party's relative tolerance, including its desire to project a moderate image abroad, memories of the Cultural Revolution, a desire not to prowoke another reign of terror by cracking down too harshly and, most important, the fact that the demonstrations serve the interests of certain factions at the top levels political leadership in ongoing debates over reform.

the Deng leadership sceks, Mr. Deng and his reform group have been using the protests to evert pressure on top leaders for their political reforms to accompany economic changes. They argue that China's openness and economic de-velopment cannot be sustained unmore limited reion less the party decentralizes its pow-er and reduces its role in economic This is not the first time they have done this. In the late 1970s they let the so-called Democratic Movemanagement. Their attempt to gain acceptance of such a proposal at a Central Committee meeting in Sep-tember was blocked by conservative

leaders led by Chen Yun, the Politburo member and economic plan-ner. The final resolution talked about building socialist spirimal civilization rather than reforming the political system. Yet the debate on political re-

his reform faction have called for

form continues, and it encompasses more radical suggestions. Some intellectuals say political reform should not be merely a tool of eco-nomic reform. Others urge the party to lessen its role not only in the economy but also in the judiciery, the government and everyday life. Although these recommenda-

Since the spring of 1986, the par-amount leader, Deng Xiaoping, and for more far-reaching reforms than

ment use wall posters, pamphlets and demonstrations to force out reand comparison in the central lead-enship and to launch their own eco-nomic program. When Mr. Deng's goals had been achieved, he cracked down on democratic activists.

previous reforms, as they tried to do

#### A similar scenario may he unfolding today. To bring about limited political reform, the Deng leadership may have allowed student demonstrations to soread --- before gradually suppressing the protests. If the demonstrations became too disruptive, the conservatives could use them as an excuse to call for an end to or even a reversal of

m the "spiritual pollution" campaign in the fall of 1983. While the top leaders may be able

their own purposes, almost invari-ably the protests set in motion ideas and actions that the leadership cannot wholly control. In a similar fashion, Mao Zedong used the Red Guard demonstrations during the Cultural Revolution to purge the opposing political faction. His call "to rebel against authority" led to anarchy, which he finally sup-pressed with violence. But if also altimately led to the Democratic Movement of the late 1970s.

Although Mr. Deng initially used the Democratic Movement for his own purposes, he, too, reined in the activists when they demanded more democratic rights than he was will-ing to allow. Yet their demands have stimulated the current debate . on political reform. China's recent bistory suggests that demonstra-tions, manipulated to exert pressure out top leaders, spark ideas and practices that the manipulators cannot fully extinguish.

The writer, professor of Chinese his-tary at Boston University, contributed this comment to The New York Times.

### **The French** Don't Want \* Ideology

**...** 

#### By Flora Lewis

PARIS — This week, French com-mentators say, will be decisive in determining if the government can weather the current storm of labor protest or if it will face upheaval with scrious economic consequences.

Jacques Chirac's stem refusal to budge on demands from striking railway workers has been compared to Ronald Reagan's harsh stand against air traffic controllers and Margaret Thatcher's success in breaking the coal miners' strike. These turned out to be watersheds for union power. and Prime Minister Chirac is going for a similar victory. The Communist-led CGT, the

largest union, and the Commu argest union, and the Communist Party are scorrying to catch up with the wildcatting workers and to pro-vide leadership with a call for a three-day general strike in the public sec-tor. They are not likely to succeed. The Communists' approach to social problems and their basic idea of class problems and their basic idea of class struggle are widely seen as obsolete. But there is a general mood of inita-tion with government policy. The ominous sense of trouble ahead comes from two layers of dis-satisfaction far broader than those marife demands One concerns and

specific demands. One concerns ans-terity, which has brought inflation down sharply in four years. Workers feel they have sacrificed long enough and it is time for rewards, although no one wants to restart inflation.

The other, more vague, perhaps more profound resentment is that wage and other restraints are now accompanied by measures meant to liberalize the whole structure of the French economy, in the 19th century free-market sense, à la Reagan.

Tax cuts for the wealthy and moves diluting the government's role in pro-tecting workers are seen as an ideological campaign that goes well be-yond what is needed to regain economic vigor and spark enterprise. Even former President Valéry Gis-card d'Estaing, a man of the center-right, said there "can't be good eco-nomic liberalism without a social conscience, because France is sensi-

tive" about these things. Former Prime Minister Pierre Manroy, a Socialist, charged that the 7. government wanted to organize the country like a French train, "with first and second class."

Nor can France apply its kind of Reaganomics by piling up vast defi-tats and debts, because in cannot attract endless foreign funds, as the United States has, Interest rates were raised twice last week in hopes of heading off a run against the franc that could force devaluation.

In a peculiar way, Mr. Chirac is making the mistake that his Socialist predecasors made when they won power in 1981. They thought they had a mandate for an ideological pro-gram, and they shoved it through. So did Mr. Chirac when his rightist co-dition took own last March But in alition took over last March. But in fact both times the electorate had

simply turned out a government it

did not like to give the opposition a

Last-Ditch Remedies for an Ugly American Decade ORAL GABLES, Florida - It looks as if the 1980s may be remembered as the ugly decade.
 We have wimessed in America a kind of general

know-nothingness in which evading critical prob-lems is a substitute for grappling with them, in which damage-controlling an error is better than avoiding it, in which sitting tall in the saddle is preferred to riding forward, and in which, amid the verbiage, certain essential freedoms and equalities

of national life are diminished and eroded. Notoriously, President Reagan's two admit trations have produced a massive budget deficit which, if allowed to grow untended for two more years, would modify the national structure. By James A. Michener

typical financier, and the takeover artist who can orchestrate a greannail coup has become a more lauded hero than the manager of a corporation that is bring people and making a usable product. The ugliness of the decade crops up everywhere. A former secretary of the interior, James Watt, denigrates America's national heritage of parks and open lands. Attomey General Edwin Meese strives to rewrite the constitutional pattern. Ultraconservative religious forces are encouraged to run wild. The public school system, one of the reasons why America became a superior society, is threat-ened. Under the banner of protecting home and family, government invades the bedroom. At this propositious moment, the Resean adinistration shoots itself in the foot with its handling of the Iranian hostage crisis, selling arms to a proclaimed enemy and illegally formeling the pro-fits into the marky situation in Central America. There is disillusionment at home and scorn abroad. For the first time that I can recall in my work abroad, other nations laugh at Americans. I hope things can be repaired. Since 1960, Amer-ica has not treated presidents well. John Kennedy was murdered, Gerald Ford shot at twice, Lyndon Johnson run out of office. Richard Nixon resigned, and if Ronald Reagan is emasculated, America will

control of those best qualified to conduct it. Cow-

boys in the White House cellar must be reined in. Third, he should disband his damage-control squad. If error is promptly admitted and rectified, no cleamup squad is needed. Fourth, he mist knock off the windy macho

abalisms. The United States faces serious problems. If in his next State of the Union message he clauts that it is still standing tall or that it is once again respected throughout the world because of victory in Grenada, Congress is goin and listeners abroad will guffaw. Further ridicale is something America cannot afford.

al Il Is Dala. Io u The best that can be said about it is that, where it might have been belligerent, it makes modest concessions to the Democrats' new control of both houses of Congress. It is vintage Reagan, only less so. After four years of modest growth, for

which the president claims immodest credit, his is a sorry vision of what a prosperous nation should provide. He still wants to pump up Pentagon spending, but not so much. He still stands firm against tax increases, but perhaps not quite so firm. He still wants to minimize government and reduce social spending, but maybe not so tenaciously. Most important, he insists be wants to reduce his hage deficit - but proposes no plausible political strategy to achieve that goal.

The president is probably correct in saying that the deficit is shrinking, but wrong in calculating how much. Only three months after Congress finished work on the 1987 budget, the deficit will he almost \$25 billion larger than previously thought.

Now, by assuming that the economy will grow faster than most forecasts, Mr. Reagan pretends his plan for fiscal 1988 would yield a smaller deficit than is likely. Moreover, he tosses in "savings" that he knows Congress will not accept. He may devoutly

### **Other Comment**

#### The Wars of One World

Two wars, Lebanon apart, have racked the Islamic world since the beginning of this decade, and only one shows signs of reaching its natural term. The arrival in Kabul of two senior Soviet politicians reinforces the crase-fire initiative announced by the country's nominal leader, Dr. Najibullah. In Iraq, meanwhile, they are celebrating as a famous victory one more episode in the to-and-fro of hugely wasteful infantry attacks. Not the least difference between the two wars is that the one in Afghanistan is a serious emberrasament to a superpower ---the bleeding wound, Mr. Gorbachev called it - and the other is one that both superpowers can contemplate with equanimity.

The United Nations has been actively occupied over several years in searching for an Afghan peace formula and has almost found it. The only remaining hurdle — at the negotiating table at least — is the date of a Soviet withdrawal, and obviously that cannot be decided until all the other elements have fallen into place. In the Gulf War there are no effective mediators.

The Gulf War is the more intractable [of the two conflicts] and by far the bloodier. At first it seemed likely to have the wider repercussions in cutting an artery of oil. But that has not happened. Mr. Shevardnadze, [the Soviet foreign minister], is in Kabul to tackle a soluble problem. For the time being the Gulf War is not in that category. - The Guardian (London).

I have watched three other nations -- Germany, Japan and Brazil - incur so much debt that then only solution was to debase their currency, wipe out the debt and damage grievously the middle class. The very rich and the very poor are not scriously hurt, since the rich can afford to lose and the poor have nothing to lose. But the middle is crushed and sometimes never recovers.

Meanwhile, the fortunes of the poor, the minorities and students have suffered reverses so gnevous that the United States is in danger of losing its reputation as a haven. It is becoming a society in which advantage is to the rich, disadvantage to the poor. Night after night I hear administration spokesmen reason that, since the Dow Jones aver-age has risen another 10 points, all is well with the republic, ignoring the fact that olimen in Louisiana are wallowing in bankruptcy and farmers in Iowa are losing their farms. As I listen I recall Oliver Goldsmith's reflection on his deserted village:

Ill fares the land, to hast'ning ills a prey.

Where wealth accumulates, and men decay. During this decade, the accumulation of wealth has been deified. Ivan Boesky becomes the proto-

WASHINGTON - It is not my

W tendency to come to the sup-port of President Resgan; I am not, I imagine, commonly identified with such effort. I would, however, fike to

break with past practice and applaud his decision to have an investigation of the National Security Council and,

more especially, the sound instinct that caused him to assign to the task

This investigation is not called for

by recent developments alone; it is long overdue. I plead, accordingly, that it not be confined to the Iranian-

Nicaraguan disaster. No segment of the government over the last 25 or 30 years has had such a record of error

error. This they have not done; re-

peatedly it has remained for Con-

gress and the press to expose unwise

and profoundly damaging action. The list of mistakes, all in retro-

of Vietnam; the secret bombing of

Cambodia; the tragic, but also hudi-

crous, helicopter rescue adventure into Iran, which was a columnating

step in returning President Jimmy Carter to Plains, Georgia.

two former members of Congress.

appear to the rest of the world as just one more banana republic. Mr. Reagan's unmatched popularity is an asset that must not be casually wasted. First, the president can stand before the people and say: "I allowed an error to occur. I have

corrected it. And I won't let it happen again, for I obey the laws and traditions of this nation." Second, he must return foreign policy to the Michener, the novelist, to The New York Times,

Fifth, be must let it be seen in all he does and says that he is a humane man who cares as much for the poor and the middle class as for the rich. Sixth, he should wrestle honestly with the deficit and not rely on legendemain. The government should raise taxes and cut spending. (But since Republicans refuse to do the former and Democrats are unable to do the latter, I suppose we will stagger along toward a major devaluation.) Seventh, everything the Republican leadership

does in the next two years, and all the behavior of the Democratic Congress, ought to point toward a smooth, responsible transition to the next adminis-tration. Last October it looked as if that administration would be Republican, but that party's debacles make its victory less automatic.

The ngly decade is drawing to a close. I hope President Reagan can regroup his forces and end his spectacular incumbency in orderly fashion. But he can achieve this only if adventurium ends, only if sensible controls are established and only if the people are addressed in words of common sense.

chance, not to remodel the country. French politicians do not seem to have absorbed the fact that their voters were not switching from one ideology to another, they were switching off ideology. The misapprehension has been compounded by lack of de-bate, of explanation, of the airing of diverse aspirations and priorities so that some consensus can emerge. The Chirac government has

pushed through most of its bills under a provision for legislation by decree, really meant for emergencies or unusual circumstances. This opportunity for parliamentary railroad has been abused because Mr. Chirac was in a harry to get his program enacted well before presidential elec-tions due in the spring of 1988. On occasion, President François

Mitterrand, a Socialist, has used his right to refuse to sign a decree, and normal legislative action was made necessary. Mr. Chirac's people reacted as if the president were meanly indercatting them. But soured feelconsider that its views were really taken into account. The constitution has been scrupulously respected in the acerb regime of Mitterrand-Chirac "cohabitation," but excess pa-tronage and gimmicks used to replace customary democratic procedure exact a price in public confidence.

Mr. Chirac likes to wield power with a strong grip. He has huge hands, which clench and flex when he is making a point, even though be can keep his face smiling, relaxed, apparently serve. His government has said it will not back down, and be may get away with it. France does not like turmoil. But flaunting power is not the same as leadership. However tall he may stand, the polls show him sagging badly now in public esteem.

The writer, on economist, pro emeritus at Harvard University and for-mer ambassador to India, contributed this comment to The Washington Post. The New York Times.

#### 1937: No to a Blockade

TRIPOLI - The Arabs of Tripolitama, those near the coast-line at least. are betwixt the hammer and the anvil. Most seem to realize that the Italians are here to stay, and it is practically certain that if they had the power of taking a decision they would come to terms with their new masters. The coast Arab refrains from making submission to the Italians because he dare not. His old masters stand in the way. During their occupation, the Turks succeeded in inspiring the tribes with a respect for Turkish authority. If the Arab is to be won over to the Italian side, he must be defended. The Turks have given him protection but kept him short of food. The Itshans have

LONDON - The British government turned thumbs down on French suggestions that an Anglo-French na-val blockade of the Spanish coast be instituted to keep out foreign volunteers and gun runners and to let the Spaniards fight out the civil war in comparative privacy without letting it degenerate further into an all-European brawl. If the blockade would serve that purpose, Britain would be only too pleased to donate its navy to the good cause, it was indicated here. However, it is feared that a blockade attempted by any one, two or threes, powers might be less effective than? provocative and might unwittingly bring on a wholesale war that Britain is so anxious to prevent. Britain has failed to give him protection and he not ruled out the blockade idea as a cannot be blamed if he elects to go possibility in the near future if the short of food rather than lose his life. Spanish situation does not improve.

### The Engineers Are Tinkering With Cicero

By Taft H. Broome Jr. This is the first of two articles.

The most defensible moral position in

opposition to Cicero is based on revolu-

tionary ideas about what engineering is.

It assumes that engineering is always an

experiment involving the public as bu-man subjects. It suggests that engineer-

MEANWHILE

ing decisions are always made with in-sufficient scientific information.

In this new view, the risks taken by

WASHINGTON - Until now, en-gineers would have been judged wicked or demented if they were discovered blatantly ignoring the ancient im-The debate is largely over four moral perative of the philosopher Cicero: In whatever you build, "the safety of the codes: Cicero's stipulation of public welfare as the paramount value, and

public shall be the highest law." Today, however, Three Mile Island, Bhopal, the shuttle Challenger, Cherno-byl and other technological borror stories tell of a cancer growing on our values. These engineering disasters are the results of willful actions, yet these actions are generally not seen by engi-

neers as morally wrong. They are judged to be ordinary. And some engineers now espouse a morality that rejects the idea that they have as their prime responsi-bility the maintenance of public safety. What is this new morality of engineer-ing? Can it be justified morally? If not,

has modern culture become some sort of technological Sodom and Gomorrah, with no one protecting the public? Debate on this issue rages in the liter-

ature, in the courts and in conversations among America's 1.3 million engineers.

LETTERS TO THE EDITOR by their Lebanese captors in "retalia-tion" for the U.S. aggression against Libya. Members of the Kilburn family, still in mourning, took the time to attend the university rully to announce that Mr. Kilburn hed some to Being because of Kilburn had gone to Beirnt because of his dissatisfaction with U.S. policy in the Middle East. They made it clear that his death should not be viewed as a justification for the very policies be opposed. If Mr. Kilburn died a marryr, then he died a martyr to the cause of peace in Lebanon and not for the cause of Ameri-

Manhasset, New York.

people whn depend on engineers are not merely risks over some error of scientific

three rival points of view.

principle. More important, and inevita-ble, is the risk that the engineer, con-fronted with a novel technological problem, will incorrectly judge which precedent that worked in the past can be successfully applied this time. These moral ideas go to the heart of

understanding how we arrived at the technology that surrounds us.

Most of the codes of ethics adopted by engineering professional societies ce with Cicero that the engineer shall hold paramount the safety of the public. But undermining this is the conviction of virtually every engineer that risk-free engineering can never be achieved. So public safety can never be guaranteed. A noteworthy exception to engineers' reverence for Cicero's code is that of the Institute of Electrical and Electronics

Engineers, the largest of the engineering professional societies in America. Its code includes Cicero's, but adds three other imperatives opposing him, with-out giving a way to resolve conflicts between these four paths. The first imperative challenging Cic-

ero's approach is called the "contractarian" code, fis advocates note that contracts on paper exist between engineers and their employers or clients. They deny that any contract exists, implied or explicit, between them and the public. The first principle for adherents of the contractarian code is the honoring of "real" contracts, leaving the safety of the public to their employers, or clients, When engineers fit the Ford Pinto's

gas tank with insufficient protection to survive rear-end collisions, or when engineers at Chernobyl adhered to specifications for the plant that did not include a containment structure to keep radiation from spreading in case of an accident, or when Morton Thiokol engineers reported the O-ring defect to their superiors rather than to the astronants, defcrence was given to the contract imperative, rather than to the public safety. But the contractatian imperative is flawed by two contradictory sentiments. The first denies outright that the problems with modern technology are the responsibilities of engineers. In his 1976 book "The Existential Pleasures of

Engineering," Samuel Florman suggests that the responsibility lies with the public. It is they, he argues, who "commissioned engineers to invent" technology.

Page 5

. . . .

The other sentiment is that engineers, as professionals who alone possess the highest degree of expertise for controlling technology, are subject to a Nuremberg-like principle: Regardless of what one's contracts with employers or clients may stipulate, or what public law may say, professionals are personally responsible for the effects their practices have on public health and welfare.

This leads to the second moral position in opposition to Cicero's position: the "personal judgment" imperative. Its advocates hold that in a free society the interests of business and government are always compatible with, or do not con-flict with, the public interest.

There is only the illusion of such con-flicts, they argue, owing to the efforts of self-interest groups; or of the business or government persons who act unlawfully in their own interests without the knowledge and consent of business or government; or of reactionaries impassioned by the loss of loved ones or property due to business-related accidents.

The central question for "personal adgment" adherents is: In what measure shall the interests of the public, business and government be served? Shall engineering work always secure business profits? In the case of the Ford Pinto, that would mean that business would be allowed to atone for its techno-payoffs which may not be severe enough

to discourage incompetent engineering. In deal with these questions, "personal judgment" advocates urge engineers to achieve balance in the degrees to which their service satisfies these various interests. They say this can be accomplished by an engineer using common sense founded on traditional values such as honesty, integrity and fair play.

Undermining this imperative is the absence of a formula for distinguishing good balances from bad ones.

The third rival to Cicero-style morality follows from new ideas about the basic nature of engineering. These ideas are lethal to Ciccro's agenda. Fnr this approach has a correct premise: Engi-neering is neither an applied science nor any other kind of science.

The writer is director of the Large Space Structures Institute at Howard University and chairman of the ethics committee of the American Association of Engineering Societies. He contributed this comment to The Washington Post.

Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's signature, name and full address. Lei-ters should be brief and are subject to editing. We cannot be responsible for the return of unsolicited manuscripts.

### There are, blessedly. Shcharanskys and some journalists who cry "wait, wait" to the world.

He looked at me, grinned, and we both said it: "Pretty good job." I understand the duty of a cohumnist

to give the world guidance and f solemn-to shirk long -- I will be laying out some pretty pithy instructions to the citizenry and government. The underlying assumption, of course, is that they will be carried out to the letter, otherwise no fair. But f figure f am entitled to at least one column about things where f wouldn't mind a bit of guidance myself. For instance, I would love to know who is handling Soviet public relations, because if it is on the exchange f would buy a little stock. Mikhail Gorbachev is certainly a far smoother chap than most of his predecessors, but he has not touched the total police nature of the Soviet state and not even hinted he will. How could he? He is part of it and rules through it. But every time he says that he will let a long-suppressed book be published or allow a private citizen to own a pushcart, or releases one of his

Free Lung Barner he ample supply of prisoners, the West goes into a mad fandango of appreciation. There are, blessedly, Shcharanskys and some journalists who cry "wait, CHAR AT FLORE A DESCRIPTION same and there are been ANTHER ALS STATE WORKED Statement in the lines wait" to the world, but they are outnom-STE along he estimat bered by the eager folk who clap their hands and sing praise. Myself, I will wait Parameters Marga-Mainter a second dimeting until Mr, Gorbachev arrests and tries the men who sent Anatoli Shcharansky to jail and Andrei Sakharov into enle; General A. Charles 12 SHORE ADDITION .....

time enough then to clap and sing. Something else I don't understand: Server and the second Reacherers in the second 

A.M. Rosenshol's opinion columns, of which this is the first, will be appearing in this space. Mr. Rosenthal is associate editor of The New York Times. He was executive editor from 1977 until last November.

N EW YORK - The day the paper moving out as executive editor and that Why don't they know in Washington that the way things in South Korea are going there will be a revolution within two years. The military government there will use heavy American arms to kill it. We will be identified with the tyrant again and unless we do something to show now, right away, that we stand for political democracy in a country whose rulers are totally dependent on America militarily, we will reap in plenty the hate we are sowing. A Middle East wonderment: When

Yes, I said, as a matter of fact I think will an Arab leader say publicly what so I will go to the Middle East right away. No, maybe Chile would be better now. exists already but is too dangerous to mention out loud. Of course be will have to make sure in advance that the PLO knows that to kill him will mean its immediate annihilation by his Arab al-lies. The answer is a political and histori-cal equation that Arab and Israeli leaders know in heart; Jordan plus nego-tiated chunks of the West Bank plus internationalized Jerusalem shrines equal the Palestine homeland. Israel will accept after internal anguish because a bounded Kingdom of Jordan-Palestine is better than generations of battle against unbounded hatred.

At home, I do not understand why all the people on Wall Street are not scared to death. The gap between what business thinks is acceptable and the ethical standards we were taught in civics classes is becoming so very large that in a short time the people of the country will turn in wrath. Then a rather dangerous popu-list wrath will not only wipe out greenmail and shoddy leverages but a lot of the rest of Wall Street with them.

And f wish somebody could tell me what to do in my own city when I walk in the street and run into a test of soul f thought I had left behind me in Calcutta. I see a body in the street, still but probably alive. Do f walk around it as f did in Calcutta? There f felt shame for stepping around a living body. In New York I feel anger - at the city, the body. Shame did not help. Will anger be more use?

Of course I am not all that puzzled, but just putting down a few things that are on my mind at the moment and that I intend to get back to.

Oh, and one little personal note. When I was born, my mother really did not cry out "Harry, let's call him A.M." The initials and dots in my name were put there long ago by an editor who gave me my first byline but thought my first name was not quite, or maybe too quite. My name is Abraham, as in Abe. And as I was riding from a chat with the president — Mubarak, not Finochet

this time - I thought of that carpenter and nodded to myself companionably: pretty good job. Then I flew off to right talk things over with a most unusual young sultan in his palace by the sea. The New York Times.

as proposing that the United States stop Why Not Yellow Ribbons? Regarding "Against the Yellow Ribbon Syndrome" (Dec. 2) by Mike Royko:

Mr. Royko fails to reason that expatriates are here, or elsewhere, because they are needed. Would he sever diplomatic relations? Does he advocate the removal of all foreign military installations? Of the foreign educators, religious orders, volunteer agencies and the busi-nessmen who are the slim hope of better conomics in many countries?

f assume that the old lady Mr. Royko mentions, who was mugged in her Chi-cago kitchen, at least had the sterling assistance of the Chicago police force. We who live abroad may not have the privilege of such expertise.

We are merchy Americans doing our jobs. God forbid that we disturb the tranquillity of Mr. Royko - or of Mark ' Heller, the Cornell professor he quotes

#### Christian-Jewish Dialogue: First Expurgate the Fathers

There is truth and wisdom in Dean Richard Harris's views on relations be-tween Christians and Jews (Other Comment, Dec. 24). Yet the main point for a dialogue is not the need for a Christian to feel "the full force of the attraction of daism" and vice versa. An essential condition is to eradicate the awful fabric of anti-Semitism developed through 20 centuries of Christian teaching of contempt - milleonia in which the cross and the sword, allied by the strength of the secular arm in most Christian nations, persecuted defenseless Jews with bumiliations, plunder, pogroms, deportation, slaughter and crusades.

Separation of church and state bas put an end to official hostility against

### Kenya Is Moving to Increase Moi's Power

By Sheila Rule New York Tunes Service NAIROBI - The Kenyan authorities have been placing more and more power in the hands of President Daniel any Moi and the nation's sole political party, and some church leaders and other critics are warning that such steps border on totalitarianism in a country that professes to be a democracy. The Parliament of Kenya, a pro-

Western nation that has long stood as a symbol of relative stability in Africa, unanimously approved a constitutional amendment last week that stripped the security of tenure from the powerful posts of attorney general and auditor general. The attorney general is the country's chief legal officer, and the auditor general oversees its socounts.

Tenure had been provided to protect the officeholders from po-litical pressure. Mr. Moi, whose the debate by declaring that the power has grown steadily in the last party was more powerful than any other institution in the Kenya in four years, now has the legal power to dismiss them. One member of Parliament was

barred from taking part in the final vote on the bill after he spoke openly against the change and refused to withdraw a remark that members had been subjected to intimidation in the current session.

The bill was passed after a public

bishops said that 'already the party is assuming a totalitarian role. It claims to speak for the people and yet does not allow the people to give their views."

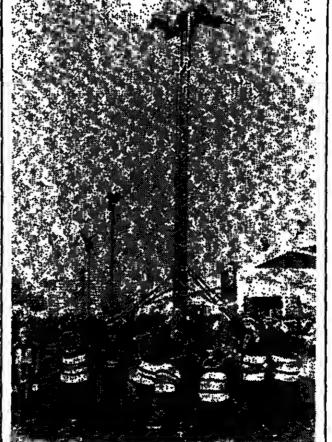

They voiced concern over assertions that the power of the party was paramount and that those who thought otherwise were considered disloval. "At present," the bishops said,

"discussion is precluded by the allegations of powerful party officials that any questioning of the system is tantamount to disloyalty. Already the party is assuming a totalitarian role. It claims to speak for the people and yet does not allow the people to give their views. "We see the Constitution as a

guarantee of peace and stability. We are alarmed at calls from politicians to change the Constitution and at the case with which this can be effected. We are not constitutional lawyers, but we instinctively fear that any suggestions that the Constitution is easily changed will lead to instability."

The influential Law Society of Kenya and the National Christian Council of Kenya, representing about aix million Protestants, also publicly criticized the amendment as a trend toward the erosion of democracy.

Kenyan critics of the government assert that bundreds have The bishops, who represent been detained in Mr. Mor's drive to about three million Catholics in root out the dissidents and that the Kenya, a nation of 20 million peoauthorities have been guilty of deple, said they were "conscious of a certain inadequacy of dialogue in tentions without trial, sentencing defendants to prison without access to legal counsel, holding people without saying that they were in

On Nov. 8, the day of Mr. Giwa's functal, all Nigerian newspapers came out with black mastheads. It

was the first such tribute since 1976, when the president, General Murtala Ramat Muhammed, was assassimated

Nigeria's grief over Mr. Giwa's death seems sourred in part by the average man's identification with the editor. Mr. Giwa's father was a laundryman who paid his son's school fees by washing the clothes of teachers at Oduduwa College in Ife, about 140 miles (225 kilometers) northeast of Lagos, where the younger Mr. Giwa was editor of the

school newspaper. Mr. Giwa traveled to New York in 1971, supporting himself by working in a plastics factory and by driving taxis. In his free time, be earned a degree in English from Brooklyn College.

He later carned a master's degree in public communications from Fordham University and worked as a news clerk for The New York Times

In 1979, Mr. Giwa returned to Nigeria to work as a newspaper editor.

Mr. Giwa's independent and abrasive style as editor of The Sunday Concord landed him in jail for two weeks in 1983, when Nigeria. was under civilian rule. Two years ago, when a foreign-exchange shortage limited the imports of Time and Newsweek magazines, fourth time in a year to answer Mr. Giwa and Mr. Ekpu launched questions about his coverage of a home-grown version, News-

watch. The magazine grew to have an estimated circulation of 50,000, one

of the largest in Africa. Acerbic reporting increased sales. Two weeks before Mr. Giwa's death, the Newswatch cover story was titled: "Nigeria - Why Nothing Works." Two months after Mr. Giwa's funeral, Mr. Ekpu said, police investigations are "just moving in cirdes

Meanwhile, Lagos newspapers continue a low-key campaign: In odd corners of their pages are little boxes that read, "Who Killed Dele Giwa?"

### **The Dance Legacy Of Serge Lifar**

#### By Anna Kisselgoff New York Tunes Service

WHEN Serge Lifar was first introduced to the dancers in the Paris Opéra Ballet in 1929, their attitude toward the new Russian guest star from Diaghilev's recently disbanded Ballets Russes was decidedly hostile. Within a few hours of rehearsal, however, their future director already felt at home. Looking back later upon his relationship with the company, Lifar saw himself as "a sort of happy shepherd.'

Lifar's flock, in fact, remained unusually loyal during the nearly 30 years he reigned as head of the Paris Opera Ballet. A controversial figure whose self-advertising personality may have hindered a balanced appreciation of his achievements, Lifar has been easily scorned by British and American critics who - unlike the French - have not seen the majority of his ballets. In most cases, they did not see Lifar at his dancing peak.

His death in Lausanne on Dec. 15 at the age of 81 is a reminder again that Lifar's career - with all its contradictions - needs to be placed in perspective. Universally dubbed one of ballet's greatest egocentrics (even by his admirers), he has also been recognized (even by his detractors) as the major figure in the renewal of 20th-century French ballet. Yet, perhaps in the long run he will and should be remembered for ideas and actions that were forerunners of many premises we now take for granted in dance.

Born on April 2, 1905, in Kiev, the son of a civil servant, Lifar began studying ballet at the late age of 16. A friend took him to the private school of Bronislava Nijinska in the Ukranian capital. Nijinska rejected him, but he managed to get into the classes she taught in the state-run Central Studio of the Kiev Opera Ballet, which she then directed.

When Nijinska rejoined Diaghiley's company in 1921 and sent for five of her best male pupils from Kiev, Lifar substituted himself for one who dropped out. As a dancer and, later, budding choreographer in the Ballets Russes from 1923 until Diaghilev's death in 1929, he was clearly the impresatio's favorite. Diaghilev sent him to study with Enrico Cecchetti in Turin to make up for his lack of classical training.

Despite his late start, Lifar had an unassailable stage presence. In a company that was totally experimental, he was perfect material. Nowhere was this more evident than in the young George Balanchine's ballets. Beginning with "Barabau" (1925), a comic ballet to a sung cantata in which Lifar was a police sergeant chasing an Italian peasant, he was cast in most of Balanchine's ballets. This historical fact was recalled by Balanchine many times in recent years whenever he was accused of not having created major roles for men during his career. The premieres of "Apollo" and "The Prodigal Son," of course, his ideas -did not receive universal recognifeatured Lifar in the title role.

Lifar also danced in the numbers Balan-chine created for Charles B. Cochran's revue in London in 1930. A year earlier, however, Lifar had been invited to dance in the Paris Opera Ballet's version of Beethoven's "The Creatures of Prometheus." Balanchine, the original choreographer, fell ill, and Lifar took over the choreography. In 1931, at the invitation of Jacques Rouche, the Opera's director, Lifar officially became ballet master and dancer. He was director until 1945, when charges of collaboration with the Germans - not helped by his own boasts of high connections with German authorities caused him to leave and become director of the Nouveau Ballet de Monte Carlo. Cleared hut given a year's suspension, he returned as director of the Paris Opéra Ballet in 1947. The condition was that he not dance on stage, given postwar feelings. In 1949, he danced again, and his last performance at the Opera was as Albrecht in "Giselle" in 1956.

He resigned as director in 1958. No factual account can quite convey the passions Lifar engendered. These were root-ed in his artistic ideas, not merely in his wellpublicized escapades nor on his penchant for creating roles for himself.

But it was his serious side that caused the deepest controversy. He held high the banner of neoclassicism in ballet and campaigned to make choreography an independent art. In the age of Balanchine, this is a familiar aesthetic. But it must be remembered that Lifar publicized this viewpoint in the 1930s, when it was far from accepted.

In retrospect, the ideas of Lifar, Nijinska and Balanchine are remarkably close. The academic idiom was a springboard for inno-vation. Dancing was to be the prime element in ballet. Early on, Lifar recognized Nijinska's insistence on the antonomy of ballet technique - that its formal values had their own meaning.

Lifar publicly went further. Dance, as an independent art, could exist without music, he proclaimed in a manifesto in 1935, as ch as 15 years before modern dancers, mu including Merce Cunningham, came to the same conclusion. Lifar realized these ideas in "Icare" (1935), his most famous ballet. He choreographed the work to no music -- only a percussion score based on his rhythmic counts.

Lifar also added what he called the sixth and seventh positions to ballet's five basic foot positions. In the sixth, the feet were parallel - Lifar often gave his ballerinas plies on toe in this position. In the seventh position, one foot was behind the other in single file. We saw it in the archaic profile with shoulder held forward in the Paris Opera Ballet's revival of "Les Mirages," seen in New York last year.

Lifar's choreography - the execution of with "ballet months." tion. In part this was because, unlike Balan-

chine and Nijinska, he insisted on dancing and charcographed often to his own capabil-itics. More important, he had never acquired A child's-eye view is unreliable, but in 1949. and choreographed often to his own capabilities. More important, he had never acquired the full lexicon of classical training they had received in St. Petersburg. Whether he had the requisite genius is another issue.

Lifar in "Icare," staged for the Paris Opéra Ballet, 1935.

Nonethcless, the seriousness of his endeayour should not be questioned. One has only to recall the decadent image of the Paris Opera Ballet when be took over. He battled with the concept of the Opera "as a drawing room" where people came to socialize, and he sought to make ballet more than trivial entertainment. His first order was that the house chandeliers be extinguished during May by the Opera's école de danse. performances. Male dancers were ordered to shave off mustaches, ballerinas forbidden to wear personal jewelry on stage. He ended the practice of using the infamous Foyer de la Danse as meeting ground between ballet girls and admirers. He inaugurated a full ening of ballet every Wednesday, along

By all accounts, he was charismatic as a who did things his way.

In 1985, I saw the Ballet de Nancy perform his "Phedre," with its libretto and decor by Jean Cocteau. Alternately broken-lined and academic, the choreography needed better dancers, but the ballet's conception was fascinating. Lifar's major neoclassical ballet -different from his mostly allegorical works - is "Suite en Blanc," to be performed in

During the 1979 Bournonville Festival in Copenhagen, I found myself sitting next to Lifar and then met him again in 1982 at Gilberte Cournand's Galerie de la Danse in Paris. Somewhat bitter, he expressed concern that he would be forgotten. History, however, will make a place for Lifar as a serious contributor to 20th-century ballet - one

### Ibsen's Grim Last Laugh

sent the moral issues with By Robert Cushman LONDON - More than any oth-er Ihsen play, "Ghosts" tells its devestating clarity.

story through progressive revela-tion of the past; all very gripping the first time you see it and all very wearying thereafter. Nor are Ibsen's once-shocking ideas enough in themselves to hold us, though his defense of the questioning and in-dependent spirit against the dead hand of received authority grows more pertinent daily. What we need is revelation of character. We want to see people not just cleverly revealing their past but growing in

front of us in the present. In the production at Wynd-ham's, Vanessa Redgrave as Mrs. Alving mavels further than any sc-tress I have seen in the role. She shows us a woman who has all the intelligence and resourcefulness in the world, but still has to learn how to use them. Her education consists of shedding the illusions that the respectable world calls ideals. Love for her drunken husband died long before he did. Pastor Manders, the man she has always wanted, backs away from her. Her enlightened ideas themselves prove to be illusory. We leave her facing the last taboo as her son lies helpless in the grip of the syphilis that was his father's only real bequest to him. She may or may not administe enthanasia.

The National Theatre's two biggest successes of hast year were American family pieces, both auto-hiographical, both set in the De-pression: Neil Simon's "Brighton Beach Memoirs," now transferred to the Aldwych, and Arthur Miller's "The American Clock," promoted from the Cottesloe to the Olivier, where it has acquired sever-

THE LONDON STAGE

al extra actors and a revolving stage, all of which fill out Peter Wood's production very nicely. Müller's play is now billed as a vandeville, acknowledging the im-portance of period songs to the show's appeal

But though the staging works as well as ever, the play does not. The split focus is far more damaging on a bigger stage. The play brings in too many extraneous characters to be a tight family drama, too few to be a comprehensive American spic. Miller acknowledges a debt to Study Terkel's book "Hard Times": woodered what the company might have achieved if they had

### **Arafat Denounces** West Bank Aid Plan

New York Times Service BAGHDAD — Yasser Arafat has denounced a Jordanian program for Palestinians in Israeli-occupied territories, declaring that the United States and Israel would use the plan to impose "a de facto normalization of relations" between Jordan and Israel.

Mr. Arafat, chairman of the Palestine Liberation Organization, also cautioned the Arab countries against supporting the plan, contending that it would mean "an acceptance of the continuation of the Israeli occupation for at least

five years or even longer." "We are against the so-called development program which is currently being implemented in the occupied territories because we cannot possibly believe that our enemy is really concerned about the development of our land" while it is under Israeli occupation, Mr. Arafat said in an interview here Saturday.

Jordanian officials have portrayed their \$1.4 billion program as the only way to prevent an Israeli-forced exodus of Palestinians from the occupied West Bank to Jordan.

The five-year development plan, which would focus primarily on housing for the Palestinians, has been viewed as a way for Jordan to reassert its legal responsibility for the West Bank, which Israel has occupied since 1967, by providing an alternative source of aid.

#### King Fahd to Visit Britain

### Behind the Strife: Chirac Trying to Change a System

#### By Axel Krause

tional Herald Tribune PARIS -At the heart of France's worsening strike of public workers is a question that extends far beyond the state-owned SNCF railroad system and holding the line on wages: Is it possible to change and eventually reduce long established privileges, work-ing habits and benefits of five million state

loyees? No previous French government has launched a major effort to address that issue. But for the conservative government of Prime Minister Jacques Chirac, reducing the costs in the state-controlled sector, which represents about 30 percent of France's gross national product, and making it more efficient, is crucial for stimulating the economy. That explains why the government re-mains determined to implement a pay scale based on merit, rather than on seniority, at

the SNCF and possibly in other state-controlled enterprises. The original plan for the railway was suspended last week, but union leaders are convinced it will reappear soon in mother form.

The railroad program, aides to Mr. Chirac and government officials emphasized, was only a first step in providing the SNCF greater flexibility in managing its 230,000 employees and, above all, reducing costs.

The railroad has not earned a profit since 1969, but last year it reduced its loss to an estimated 3.4 billion francs (\$532 million) from 4.4 billion francs in 1985. Before the strike began, the railroad had hoped to be in the black by 1989.

However, most employees of the SNCF and other state-owned enterprises, such as the postal and telecommunications author-

ity, are determined to keep the established systems unchanged. Backed by national unions, they are chal-lenging what has been called "the Chirac prises.

#### NEWS ANALYSIS

revolution," which is based on reducing the role of the state in the economy and restoring companies to profitability.

At the Gare du Nord in Paris, where the strike began Dec. 18, a striking railroad engineer said: "We have built up a system of privileges

and benefits, and we are determined to keep it that way, whatever Mr. Chirac or the SNCF management wants."

The scope of the problem was first outlined several years ago by a best-selling book, "Toujours Plus," or "Always More," which has sold about one million copies and is still celling.

The anthor. Francois de Closets, a television commentator on economic affairs, said that what had been accumulated by workers at the SNCF, the Paris Metro, the electricity and gas utilities and in other state-controlled enterprises was extraordinarily costly to tax-payers. He said that the phenomenon was ing deliberately hidden from most of the

French public. Workers in most of those sectors were either still striking Tuesday or planned work stoppages in the next several days. Their spokesmen said they were primarily protesting the government's determination to hold down overall wage increases to around 3 percent this year.

But they quickly added they were equally determined to fight plans aimed at stream-

ining career advancement programs and lized at 10.5 percent, representing about 2.5 other changes in benefit programs that they million jobless people. Say are being planned within their enter-Le Point, a weekly French magazine, devoted the cover story of its current issue to

At the RATP, the Paris Metro and bus network, workers were not only seeking wage increases but also were challenging a plan to eliminate jobs based on productivity. Leaders of the Communist-led General Confederation of Labor alleged that the RATP man-agement was seeking to institute changes similar to those at the railroad. That has been extra, paid vacation. repeatedly denied by the RATP manage-

The benefits, many dating from the post-war period, include job security programs that emphasize advancement by semicority and restrict newcomers, provide generou travel allowances for employees and their families, tax advantages, special bouuses, reduced rates on personal use of utilities as well as employer-paid vacation and recreation plans,

These. Mr. de Closets said, had become France. "like constitutional rights, intangible, per-petual. They can only be negotiated upwards, never downwards."

Noting that no previous conservative or privileges." leftist governments had "dared" attempt a change of the system, Mr. de Closets argu that what had emerged were two major

groups in France's working population. He identified them as "those comfortably installed in their fortress enterprises" and

"those facing uncertainty and unhappiness at their precations situation," a reference to workers facing possible layoffs in other sectors of the economy.

### Herald Eribune, **BUSINESS/FINANCE**

### **Grow of** Spouses Find New Jobs, Too Hill Bid

### By NANCY YOSHIHARA

INTERNATIONAL MANAGER

Los Angeles Times Service

OS ANGELES — When an employee of a major bank in Chicago was asked to transfer to Los Angeles, her husband supported the move and decided to leave his job as a policeman to accompany her. But his search for an appropriate new career turned out to be one of the worst experiences of his life.

Finally, his frustration led him to attempt suicide. Fortunately, there was help — in the form of the bank's

spousal assistance program for relocated employees. We worked with him for three months," recalled Pearl M. Tabbert, a career-manage-ment consultant whose Chica-go company, Pearl M. Tabbert & Associates, came to the busband's rescue. "Within six weeks, he connected with a

job. He found a job he really liked, is in control of his life." job. He found a job he really nked, is m control of his hfe." While employee relocations seldom reach such a crisis point, helping a spouse find a new job is increasingly becoming a concern for major companies that frequently transfer workers. And programs designed to assist transferred spouses — male or female — with resumes, interviews and employment tips are getting more attention as part of relocation benefit packages.

There are more

dual-career families,

and they likely will

"There are more and more dual-income and dual-career families, and we are likely to see that increase dramatically in the future," said Anita Brienza of the Washington-based Employee Relocation Council, a group representing 10,000 corporate and independent relocation companies.

"There are more and more families where they work out some type of arrangement as to who is going to make the move," said James E. Challenger, president of Challenger, Gray & Christmas Inc. of Chicago. "It really is becoming a mutual decision whose careers should be governing, depending on who is easier to move."

Moreover, the second paycheck now accounts for a greater percentage — 40 or even 50 percent — of the family income. In an annual study, Runzheimer International, a Rochester, Wisconsin-based relocation specialist, surveyed 150 of the For-tume 500 companies and found that 44 percent offered job-search or companies for companies. That compared with or career-counseling programs for sponses. That compared with 20 percent in 1985.

However, only 15 percent of those offering some sponsal assistance had a formal program that appeared in their employ-ment-policy manuals and was offered to all employees. The remaining 85 percent had more informal programs.

OT SURPRISINGLY, the survey showed that the more transfers there were within a corporation, the more likely the company was to have a formal assistance program. Similarly, smaller companies were less inclined to provide assistance than larger ones.

Companies, typically, will not volunteer information about spousal assistance programs. Dick Hamlin, of the Los Angeles consulting company of Thomas-Mangum Co., said that a company's willingness to assist a transferre's spouse depends on "one, how much a company wants the individual and two, how good a negotiator the new hire or transferee is."

Corporations are taking the low-profile approach to assistance programs because of the expense, with formal third-party sponse assistance programs costing from \$1,500 to \$5,000 an employee... But, the Runzheimer survey showed, the average cost for assisting ouse in informal company programs was less than \$100 In the end, relocating can be costly for the transferee, too. The move is not necessarily perceived as a move up the promotion ladder, and giving up that second income is not easy. **Currency Rates** 

#### Minnetonka's chairman, Robert R. Taylor, moves fast with such products as the Obsession line of scents, below. His new ideas include a

Unknown Buyer bath. **Boosts Shares** 

By Warren Gerler

nal Revald Tribun LONDON -- Speculation intensified Tuesday that a foreign comshieo tuesoay mat a toregu com-pany, possibly based in Australia or New Zealand, is accumulating shares in Hill Samuel Group PLC, a British merchant banking group, in what might signal a takeover bid. Hill Samuel's share price has risincrease dramatically.

en more than 60 pence from around 360 pence before Christmas. The shares closed Tuesday at 426 pence, up 16 pence from Monday. Dolf Mootham, Hill Samuel's group finance director, said there had been buying on Monday and

Tuesday. "We don't know who has been buying," be said.

Mr. Mootham said that New Zealand Insurance Co., New Zea-land's largest insurer, had acquired under 3 percent of Hill Samuel's

shares in recent months and ap-pears on its register of sharehold-But, he said, there was no way of knowing whether NZI was behind this week's buying.

"Nobody has said they've ac-quired over 5 percent," of Hill Samuel outstanding shares, he said. Under British corporate law, a shareholding of 5 percent or more must be disclosed within three At current market prices, a full

takeover of Hill Samuel would cost an £392 million (\$577.6 million). Although the buyer's identity is unknown, analysts said that Ord Minnet, a large Australian stockbrokerage that is 50-percent con-trolled by an Australian banking conglomerate, Westpac Banking Corp., appeared to be placing or-ders to acquire Hill Samuel shares on the London Stock Exchange.

Both Ord Minnet and Westpac representatives in London declined to comment. Speculation has pointed to Westpac as a potential buyer because the bank is known to

seek diversification abroad. Russell Middleton, managing director in the London office of McCaughan, Dyson & Co., an Aus-

### Little Minnetonka Shakes the Giants

### **Consumer-Products Firm Develops Third Success**

By Steven Greenhouse New York Times Service CHASKA, Minnesota Minnetonka Corp. doesn't look like much: Its headquarters are in an anonymous one-story cin-derblock building across from some comfields. But in the consumer-products industry, the company has churned out revolutionary new products that have thrown industry giants on the defensive.

Minnetonka, based just west of Minneapolis in Chaska (population 8,643), first made its mark in 1979, when it introduced Softsoap, the first mass-market liq-nid soap — and established a new product concept that jolted the lackluster consumer-products industry.

Then came Minnetonka's Check-Up, the first anti-plaque toothpaste and the first in a pump dispenser. Now with ris-que advertisements and a marketing blitz, its Obsession scent is fast becoming the second most popular fragrance in America, behind Giorgio.

The company reached \$100 million in sales in 1985, and Robert R. Taylor, its chairman and founder, said they-should

with an unusual, often untested of their own.

"When they get all the facts together, though, they find they can't do away with all risks and they often end up either doing nothing or moving very slowly." Still, Minnetonka's chief problem has been that whenever one

of its innovations catches on, the big consumer-products compa-nies move to develop a similar product and grab a share of the market

So Mr. Taylor, a 51-year-old native of Baltimore, works hard to stay one step ahead. He is hoping to capture 50 percent of the children's bubble bath market with a new Sesame Street bubble bath. (When someone suggested test-marketing it, he said: "Every kid knows what Sesame Street is.") Mr. Taylor is optimistic about

other new offerings, too: an anti-plaque bubble gum, a wart remover and a treatment for thinning han But no matter how good his

product is only the start, as the Check-Up toothpaste experience proved: When Minnetonka's toothpaste caught on, giant consumer-products companies trampled little Minnetonka's mnovation with similar products

Some analysts also question how well an entrepreneur like Mr. Taylor will do as nuts-andbolts manager of an expanded

left his job as a Johnson & Johnson sales manager in 1964 to start the company, hiring dozens of women to handroll soap in his garage. His initial investment was \$3,000.

and waxless candles.

His first real breakthrough came one day when he was driving to work. "I thought how ugly. bar soap is, and how it usually

### Semiconductor Industry Failing, U.S. Reports

By Andrew Pollack

New York Timer Service SAN FRANCISCO - America's semiconductor manufacturers, the linchpin of the nation's electronics industry, are rapidly falling behind their Japanese competitors, according to a variety of experts and government documents assessing the situation. And while many experts have wondered

whether the industry could maintain its technological lead over Japan, the question now being asked is whether the U.S. makers of semiconductors - the tiny silicon chips that are the heart of computers and other electronic devices - will survive at all, or in what form.

An assessment by the Central Intelligence Agency concluded that "we believe the U.S. semiconductor industry is at a crucial turning point in its history. It fundamentally cannot compete in its present form."

Moreover, experts say, the decline poses a serious commercial problem, both because semiconductors are an important industry in their own right and because they are the key to many even larger industries that use the chips.

A report by a panel of the Defense Science Board, a scientific adviser to the Pentagon, is expected to recommend that the Defense Department spend almost \$2 billion over five years. A draft summary of the report and minntes of one of the panel's meetings were provid-ed by sources who asked to remain unidentified. The report is to be released this month or next

### Indonesia Budget

For '87-'88 Calls For Austerity

Jan. 6

Compiled by Our Staff From Dispatche JAKARTA - President Saharto of Indonesia presented a draft 1987-88 budget on Tuesday calling for susterity measures but projecting that a sharp decline in earnings from all would be partly offset by a nise in other revenues and forcign aid.

"Due to the extremely limited state finances, austenty measures will be increasingly tight-ened," Mr. Subarto said in an address to the House of Representatives.

He said the budget set a target of 22.783 trillion rupiah for government expenditures in fis-cal 1987-88. Although this is a 6.4-percent increase over the 86-87 in rupiah terms, it reprosents a sharp fall in dollar terms, to \$13.5 billion from \$18.9 billion in the current fiscal year, because of a 31 percent devaluation in the rupish in September triggered by the fall in oil prices. (Reuters, UPI)

technological lead in most silicon products, with the exception of customized logic chips and microprocessors. But even in those areas, the U.S. lead is narrowing. Japan also leads in non-silicon products, such as opto-electronic circuits that process light as well as electricity.

In the materials and equipment used to make chips, the United States and Japan are at par, with the Japanese gaining. The report shows that, of 25 semiconductor products or process-es, Japan leads in 12 while the United States leads in five, with parity in eight. The chart also shows that the U.S. position relative to Japan is declining in 19 of the 25 categories, including four of the five in which the United States now leads. In six categorics the United States is maintaining its position; in no case is it gaining.

The general decline could weaken the entire U.S. electronics industry so that it would no longer be in a position to advance rapidly, but the Defense Science Board's concern is most immediately related to national security.

Even though Japan is an ally, it might not want to sell the latest technology to the United States. This could be because the Japanese do not want to show their best technology to companies that also compete with them in nonmilitary areas. During the Vietnam War, for instance, some allies refused to sell equipment to the United States.

It concludes that the Japanese now have a examples of foreign dependency, and the con-celusological lead in most silicon products, cerns attached to such dependency, include the following:

> • The National Security Agency, which is charged with electronic eavesdropping and communications security, buys ceramic packages for 171 of 195 customized chips from one Japanese company, Kyocera Corp., which dominates the market. At one point, Kyocera, without warning, discontinued making the ceramic package for one key component.

· Japanese semiconductor companies that also make supercomputers are not supplying their best chips to U.S. supercomputer companies, according to Norman Kreisman, an Energy Department official involved with supercomputers. The machines, the fastest computers in existence, are used for weapons design and code-breaking, as well as for weather forecasting and other civilian applications. Lloyd Thorndyke, the president of ETA Systems, a supercomputer manufacturer, said that, since supercomputers depended on using the most advanced components, it was quite likely that the most advanced supercomputers would eventually come from Japan unless the govern-ment heiped the U.S. chip industry.

 Of 3,000 unique chips needed for the U.S. military space program, 93 are supplied by

to the United States. According to the minutes of the Defense Science Board meeting, held last February, the

### **IBM Seeks Chip-Making Consortium**

New York Times Service SAN FRANCISCO --- IBM, the biggest American computer com-

pany, is dramming up support for a chip-making consortium, according to industry sources who interpreted the move as a measure of the precations condition of the U.S. semiconductor industry,

These sources said that executives from International Business Machines Corp. had visited chip manufacturers and even competing computer companies to voice worries about the U.S. industry's decline and to lobby on behalf of the consortium. The cooperative venture would be aimed at restoring

the ability of U.S. chip makers to compete with the Japanese. Indeed, said one source involved

in planning the consortium, "Absent IBM's push on this thing, I'm not sure where it would be." The source, who sat in on a long IBM presentation, added, "They scared everybody" with their blint assess-ment of the industry's problems. IBM executives declined to be

interviewed on this subject. A spokeswoman, said, however, that the company was supportive of industry collaboration and believed a "concerted effort" was needed by the industry to reverse its loss of market share to the Japanese.

She also said that IBM, under er Technology Corp. by the end of

company and makes most of its own chips and would not be expected to rely on outside suppliers. 2 Leave MCC Consortium

the auspices of the Semiconductor 1987, officials of the high-technol-Industry Association, a trade ogy research consortium said Tues-group, had been meeting with other day. The Associated Press reported companies to plan 6 consortium. Tuesday from Austin, Texas.

 -Sees Routes Bud State "We started to return to a normalized market today," another analyst said. "There was no news around and nothing to sustain the market in terms of fundamentals. This movement up-ward was based mostly in internal dynamics of the market." He said some of the faltering in the bond market and weakness in the dollar of the 17 AAR 3 2144 AFG 3 2144 AFG 3 1644 AG55 444 AMCA 2044 A Compiled by Our Staff From Dispatcher NEW YORK — Prices on the New York Stock Exchange continued to rise Tuesday, pushing the Dow Jones industrial average to its second record finish in two days. The Dow, which soared 44.01 points Monday for its biggest daily point gain, edged up anoth-er 3.51 points Tuesday to 1.974.83. Trading was heavy, but some of the institu-tional buying that has powered the Dow's gain sputtered. Profit-taking also kept Tuesday's gains modest. James Andrews, head of the institutional trading desk at Jamey Montgomery Scott in Philadelphia, called the Dow's 75-point gain so far this year "very, very positive for the general market." average share added 11 cents. A strong bond market and the absence of tax-related selling pressures, which fueled a 75-point gain for the market Friday and Monday, were also factors Tuesday, analysts said. But at mid-day Tuesday, profit-taking in the bond market encouraged a similar move in stocks. "The market got a little tired on a short-term basis" in the middle of the session, said Gerald Simmons, managing director in the listed trad-ing department at Smith Barney, Harris Upham. "Some of the buying power has spent itself." 1233322 20222224244440725532444525444524545473255254753572542475552444555524445555254254545555254545555525454555 **244** 174 C ind s **244** 174 C ind s **245** 174 C ind s **245** 184 ICM **275** 0 IE ING **275** 0 IE ING **275** 11 C ING **275** 12 II I ING **275** 12 II ING **275** 15 II ING **276** 15 II ING **277** 16 ING **277** 17 II ING **277** 10 II 1.364 9.1 He said the industrial average could reach 2,200 by mid-February. A favorable prognosis for President Ronald Reagan's health encouraged investors, analysts STAD BOADTA 3917965997397519851546515467 said. But they said a more concrete factor is that ۰. **Distillers** Corp. To Sell Almaden

The Associated Pres

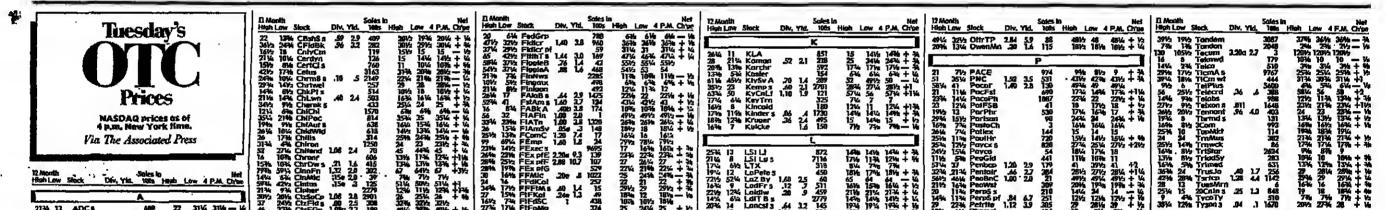

NEW YORK - National Distillers & Chemical Corp. said Tuesday it had agreed in principle to sell the brands and assets of Almaden Vineyards to Heublein Inc., a subsidiary of RJR Nabisco Inc. The price was not disclosed, but an industry source, who declined to be identified, said that it was "well m excess of \$100 million."

National Distillars announced in September its plan to sell all of its spirits and wine operations to focus on core businesses, such as chemicals and propane. Almaden, based in San Jose,

California, produces and markets Almaden brand table wines, champagnes and brandies, as well as premium wines under the Charles Lefranc Cellars label.

the second mark. At the wing mark, down by a hefty 2:17, Beashei Gilmour started a desperate tacking duel on the final leg, but was unsuccessful. (Reuters, AP, UPI)

England. One by one they roll off the

He is, by common consent among players I have spoken to, the most single-minded goal-scorer around, lately even more potent than Liverpool's Lan Rush, for whom Juvennus has agreed to a transfer fee of £3.2 million

on the word selfish. Allen sees the whites of the goalposts, shoots on sight and scores, he says, by in-

We tell him he's lazy and selfish," admits Tottenham's manager, David Plest. "Clive is unique in the English game. He's short of speed compared to lan Rush; he doesn't have the ability to outjump people, he doesn't have that clean contact and talent for bringing teammates into the game like Nigel Clough of Nottingham For-

sense that makes him the coolest finisher I have worked with. With his eyes on the ball, he knows where the keeper is. He can look one way and shoot the other. We go along with Clive's deliciencies. We adjust because, simply, he's the best at doing what he's paid to do - score goals." Such tolerance is self-imposed.

Clive Allen, left, heading in his 21st goal of the year in a match against Nottingham Forest.

days and Sundays) just about fed Tottenham deploys the 4-5-1 formation used by teams at the World Cup, leaving Allen the sole out-and-out forward.

three sons and four daughters. Cive Allen's is the new world. He scored three times in his debut as a 17-year-old for Queens Park

fullback Kenny Sansom. Maybe Allen was a pawn in Those boots, he said, were worn Arsenal's porsuit of Sansom. through to the toes after 30 games. Ernie Allen might have More likely, his apparent lack of turned in his grave. His boys shared a pair of boots because his finesse and unenthusiastic training panicked Arsenal. wage as an asphalter (phus £1 a

Terry Venables, then the Crystal Palace manager, had inside knowledge. Venables, now in milweek as a strapping center-half who played Wednesdays, Saturspell in Milan to set a single-sea-son Tottenham record of 37 goals, which is Allen's target.

Page 13

Contrary to England's customary disdain for yesterday's heroes, Greaves lives on popular memory and on his wits as a television broadcaster.

Must he something in the East End air -all that iron in the cars, and perhaps in the diet.

But where the Allens are concerned, it's in the blood. Ernic's contemporaries say he could have walked onto a top team if he'd had the opportunity and the incentives now enriching his offspring\_

His eldest son, Ron, played among England's best in the army, but broke a kneecap. Middle son Dennis played for Charlton, Reading and Bournemouth, and Les hit the jackpot with his Tottenham double.

But Clive is the first Allen to follow Greaves, Peters, Brown and Venables all the way from the neighborhood to the full England side. His first taste of international soccer came two years ago at the Maracana in Rio de Janeiro.

His cousin Paul Allen, a year younger at 24, is a hardworking creator rather than an instinctive scorer, but he is on the same Tottenham team (his first fame came as the youngest teenager to win an FA Cup medal with West Ham). Another cousin, Martin, plays regularly as a Queens Park de-fender.

And still the family tree bears. Bradley, raised on big brother's exploits and his father's tales of glory, has a few months to decide with whom to place his future. His choice is simple: any club in London.

After Bradley? Uocle Ron of the busted knee reckons be has a gifted grandson, a 7-year-old re-bel who runs around in, of all colors, Liverpool's.

And then there's Oliver Thom as Allen - remember, you read it here first. Oliver, 12 weeks old, is the firstborn of Clive and Lisa Allen. A long shot? Granted, but even in the year 2001, it's odds-on. that an Allen will be plying the family trade.

### Australia IV, left, with its controversial headsail, racing against Kookaburra II on Tuesday.

BUIVEISITY.

### **OBSERVER**

### **Television Readership**

By Russell Baker N ap suggesting that television encourages people to read. Serious thinkers, you may recall,

used to say the tube would be the death of the word, which shows that serious thinkers can be just as wrong as frivolous thinkers when they start telling us what it all means for generations yet unborn,

Their error was demonstrated one morning recently on the Donahne show when the words "obsessed with Michael Jackson" appeared at the bottom of a screen. which was otherwise filled with an adolescent female.

I had just turned the set on, the way you do when you're looking for an excuse not to go to work Suppose they've just discovered Ju-piter is on a collision course with Earth. If so, going to work would be rather pointless, wouldn't it? So I flicked the switch and the female adolescent appeared. Nor-mally I turn off televised adolescents immediately, since it's almost certain they are either going to sing

something appalling or whine about the misery of being young. but as I reached for the drop-dead button the words "obsessed with Michael Jackson" appeared.

The young woman apparently spent her waking hours thinking about Jackson, a Charmony are there is no way to know ment presides over a national phone in going on. The success of Joe Isuzu is being The success of Joe Isuzu is being about Jackson, a charming man l

Since his urbane, man-of-the-world charm, subtle wit and sophisticated insights into the modern predicament did not strike me as the sort of virtues that leave most adolescents "obsessed," I sat down to hear the case of this unusual girl.

Sitting there, I was pleased to think that if I were being televised at that instant, the words at the screen bottom might say "obsessed with obsessed adolescent."

Gradually, though, it became clear that the Michael Jackson who obsessed the poor girl was not ABC radio's Michael Jackson but a youthful crooner of the same name, and off went the telly.

Television relies more and more on these written captions to make itself interesting. The people seen complaining about life's inevitabilities every night on local TV news

would all seem alike but for the growing custom of identifying them in print as "Irate Commuter 'Abandoned Wife," "Disgrantled Sanitation Worker," and so on. One TV news department in Washington specializes in showing film of body bags being removed from scenes of grief and violence. 'This station's news shows could relieve their monotony by putting some literature under the body-bag shots. For example: "Dead of Wife's Bedside Pistol," "Blasted While Robbing Gas Station," "Tangled With Escaped Lion," "Hit by Falling Airplane."

The most exciting advance for TV literature lately has been the carance of Joe Isuzu, who amiably lies about the cars he's peddling. This is television so literate that it can make no sense at all to

York and Montreal.

and Tari was in a snit.

were French.

people who can't read. It is the TV commercial as a joke about the mendacity of TV commercials. As Joe makes some outrageous claim for his Isuzu cars, written captions at the bottom of the screen say, "He's lying," and then literally spell out the facts after each he he tells. The joke and the effectiveness of

the commercial both rely on the written messages that correct the lying pictures. If you can't read,

ascribed to the growth of "cyni-cism" in the TV audience. "Cynicism" was once defined by Am-brose Bierce as "that blackguard defect of vision which compels us to see the world as it is instead of as it should be." The definition is applicable here. Indeed, what Joe Isuzu finally acknowledges is what the TV sudience has long known: to wit, that television is an instru-

ment for the promotion of lies. Now, it says, so much of the undience knows the sad truth that

everybody can laugh about it. The question, of course, is, when will the news and the political ad-vertising move into TV's literate Inture? Surely President Reegan's recent televised efforts to explain his troubles away would have been far more successful if at the bottom. of the screen had appeared the words "Ont to Lunch."

New York Times Service

### **A Tempest in a Bordeaux Glass**

1973 Stag's Leap cabernet sanvig-non. It had topped, in order, Châ-teau Moutou-Rothschild 1970, By Frank J. #### A tasting in Bordeaux.

competition. This current chalceling the tasting made good sense, they said, because, among lenge is more serious, more permiother things, Bordeaux-California tastings had become "the favorite cions, because it is cultural. In reducing wine to a product that diversion of American wine professionals, who use them as a sort of marketing tool." The two Frenchmen described

such a comparison as "a permanent trap" for French wines. "In playing down their losses and bragging about their occasional victories," they wrote, "our Cali-fornia rivals plan to boost their reputation, little by little, to the ghts of the great Bordeaux." Bordeaux has been winning

parts of the overseas market, and certain wineries are in difficulty, Cazes and Prats continued. "The recent fall of the dollar has forced on the Californians the need to reorganize themselves. To do that, it is absolutely necessary for them to contest the supremacy of Bordeaux quality.

"Neither in price nor in quality no Prats of Cos d'Estournel, Can- do the great wines of Medoc fear

can be measured 'scientifically,' these joyless tastings mix the world of taste with that of numbers. The Californians have proved that their wines have body. Have they also a soul?" What can be said after a barrage such as that? Well, for one thing. I was one of the villains in the most recent of "these joyless tastings," and we all had a lot of

fun --- not because the Califormians won but because it was a facinating intellectual exercise. What is more, the other judges continued to speak to me even after it was revealed that I had. listed a French wine, Châtean Montrose, first. Moreover, Cazes and Prats

may he wrong. There have been financial problems in California, it is true. Marginal operations

wine business in California is fairly healthy.

Will we be able to say that about Bordeaux? With secondgrowth Bordeaux selling af about \$40 a bottle here, and with very little indication from the Medoo that any break in prices is imminent, how long can it be before the market collapses once again? Abdallah H. Simon, the chairman of Seastain Vintuers and the most influential of fine-wine importers in this country, recently warned Tari and his Union des Grands Crus colleagues that, unless the prices of their 1986 wines were 25 to 30 percent below those of the 1985s, they would find no buyers here. And the United States represents 50 percent of the sales of some of the most famous wines, such as Lafite-Rothschild. The prices of Bordeaux wines

have been increasing at a rapid rate in recent years. Until the dollar began to weaken in 1985, there seemed to be no limit to what Americans would pay. But now the franc is 50 percent more expensive than it was in the spring of 1985, and shipments of Bor-deaux wines to the United States have slowed to a trickle.

So, it may not he California's problems that have made the Bordelais so prickly. There is this to say for the French position: They were not consulted before either tasting as to what wines would be used or what rules would be followed. To that extent, they have a right to feel that they were set up. In any event, it's unlikely that Tari's methods will discourage anybody from comparing Califor-nia and Bordeaux wines. What's

more, canceling opportunities to promote your own wines in an effort to punish the competition does seem rather odd. In fact, members of the Union

des Grands Crus came to the United States in November anyway, and, as they usually do, traveled up and down the land promoting their wines. And, as they usually do, the Americans received their French friends warmly. In the end, impassioned rheto-ric is as quintessentially French as

good wine, and no one. French or American, is going to let one in-terfere with the other. may go by the board. But the fine-

Elton John's Surgery

PEOPLE

Said to Be Successful

-

Elton John, 39, is resting conf-fortably after throat surgery that appears to have cured a problem that has plagued the singer for sev-eral months. "The operation went very, very well and is successful," St. Vincent's Private Hospital in Sydney said in a statement. 'It is hoped he will not need further surgery." Dr. John Tookin, a throat argeon, said the British entertainer would not be able to sing for several months. The hospital, at John's request, would not reveal his ailment but a spokeswoman con-firmed that the singer had had a biopsy. ... Frankie Vangham, 59. left a London hospital Monday. eight days after surgery for a burst appendix and peritonius and said he was "deeply npset" to be dropped from his starring role in the musical "42nd Street." The show's executive producer, Helen Montaga, said Vaughan's contract had been terminated because "he was too ill to carry the burden of a big musical."

П The "Dallas" star Victoria Prin-cipal has sued Joan Rivers for \$3 million, claiming the talk show hostess went too far when she blurted out the actress's unlisted home phone number on the air. In the suit, filed Monday in Los Angeles, Principal said Rivers was inter-viewing the "Dallas" co-star Ker-Kercheval Dec. 15 when she trie? repeatedly to reach Principal, in tending to ask her "embarrassize questions about her personal and private life." As millions watched. Rivers announced Principal's number on the air, the suit said, resulting in a flood of calls to the actress

Π.

A 195-year-old sample of Madeira wine drew mixed reviews during a tasting to celebrate a wedding anniversary. Napoleon reportedly took the 1792 Madeira with him when he sailed into exile on St. Helena, but it was Jackson Stranck who uncorked the dark amber wine Sunday in Morro Bay, California. "My God, that's dry!" Strauch exclaimed. "The initial barshness indicates it needs a lot more time -I would say a century." Stranch and wife Catherine bought the wine Oct. 23 at a Christie's auction in London for \$467 and poured oneounce tastes for 12 friends during their 13th anniversary celebration.
